

## The remote workforce is calling. How is IT responding?

The proportion of Singaporeans currently working remotely have more than doubled from 27% before the pandemic, to 58%<sup>1</sup>. Such a shift will only gain momentum in the time to come, and IT teams will need new tools, strategies, and support to accommodate rapidly evolving preferences.

### Out of office— and liking it

**9 in 10**  
respondents now work remotely more often or about the same as before<sup>12</sup>

**98%**  
of remote workers around the world would like to continue doing so, at least part-time, for the rest of their careers<sup>2</sup>

### Meeting workforce demands

**16%**

of Gen Z and Millennial employees

have quit a job because their employer did not provide the proper technology for them to do their work<sup>3</sup>

**\$7.1 trillion**

projected investment by companies worldwide in direct digital transformation from 2020 to 2023<sup>4</sup>

### Dissolving borders

**70%**

of Singaporeans use personal devices, including laptops and mobile devices, to do their jobs<sup>12</sup>

**112%**

growth in VPN usage in Italy during March 9-15, 2020, compared with the preceding week; U.S. VPN use grew 53% over the same period<sup>6</sup>

### Stepping up to stay secure

**87%**

of successful mobile phishing attacks take place outside of email—such as on messaging and social media apps<sup>7</sup>

**59%**

of IT decision-makers are planning to invest moderately to significantly more in secure remote access technology due to COVID-19<sup>8</sup>

## The role of devices in becoming remote-ready

Workplace dynamics have dramatically shifted as employees exit the office. In turn, organisations and IT teams alike must re-evaluate existing strategies for keeping their workforce productive, collaborative, and safe. Durable, secure, and high-performance devices deliver on all these requirements—supporting organisations in their shift to be remote-ready, and empowering employees to reach their potential from wherever they work.

**80%**

of cyber security decision-makers Singapore claim that cyber security incidents pose “high” or “medium” impacts on business<sup>13</sup>

**85%**

of business leaders say employee productivity has increased in their business as a result of providing greater flexibility to work outside the office<sup>10</sup>

**92%**

of Singaporean organisations plan to invest more in cyber security due to regulations<sup>13</sup>

## Equip your workforce for success with HP EliteBook PCs

74% of Singaporeans say they prefer to continue working in a hybrid arrangement, with two or three days of working from home per week.<sup>14</sup> Now, the onus is on organisations to provide their workforce with the tools they need to work the way they want. Meet their expectations with HP EliteBook PCs, featuring:

- Ultra-slim and precision-crafted design making it easy to carry from the desk, through the office to home
- Cutting-edge security features, including HP Sure Start Gen4<sup>15</sup> self-healing BIOS, and HP Sure View Gen2 Privacy screen<sup>16</sup>.
- Advanced collaboration features that make it easy to launch and manage high-fidelity calls

HP EliteBook x360 1040 G8
