

# Is It Time to Modernise Your IT?

Take this self-assessment quiz to find out your options.

# INSTRUCTIONS

1. Go through the questions one-by-one.
2. Answer them as honestly as possible. Be true to yourself.
3. After completing the quiz, tally your scores in the area.
4. Have a look at the recommendations.

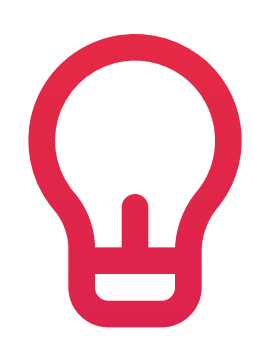

# QUESTIONS

|  | STRONGLY DISAGREE | SOMEWHAT DISAGREE | NEITHER AGREE NOR DISAGREE | SOMEWHAT AGREE | STRONGLY AGREE |
|--|-------------------|-------------------|----------------------------|----------------|----------------|
| <b>My organisation is growing.</b><br>New customers, new business, hiring new employees  | 1                 | 2                 | 3                          | 4              | 5              |
| <b>Everyone on my team is very productive.</b><br>Meets deadlines, accomplishes more in a single day than everyone else  | 1                 | 2                 | 3                          | 4              | 5              |
| <b>Collaborating with other departments is easy.</b><br>My team can create, edit, and share files without resulting in duplicate copies  | 1                 | 2                 | 3                          | 4              | 5              |
| <b>I'm 100% confident my confidential files are secured.</b><br>Sensitive business and customer data are kept and follows industry best practices  | 1                 | 2                 | 3                          | 4              | 5              |
| <b>We have disaster recovery plans in place.</b><br>Our organisation can get back to business as usual in a couple of days at 100% capacity  | 1                 | 2                 | 3                          | 4              | 5              |
| <b>My team can do their work anytime, anywhere.</b><br>Lockdown or no lockdown; at home, café, or in the office, everyone can access the tools and files they need to get work done  | 1                 | 2                 | 3                          | 4              | 5              |
| <b>My organisation has a single, robust tool for communication.</b><br>Everyone on my team can communicate with internal (other departments) and external (partners, vendors) stakeholders using different medium formats (audio, chat, video) | 1                 | 2                 | 3                          | 4              | 5              |
| <b>ADD YOUR SCORES PER COLUMN</b>  |                   |                   |                            |                |                |

# RECOMMENDATIONS

| SCORE        | RECOMMENDATION                                    | WHY   |
|--------------|---|---|
| Less than 15 | Upgrade Now<br>(in the next 3 months)             | <b>You are behind the times.</b><br>You are not only losing to your competitors at better serving your customers you are also bleeding money because of the inefficiencies of your systems.<br>Talk to a trusted IT service provider to help you identify areas for quick wins and lay out a clear roadmap unique to your business. |
| 15-25        | Upgrade Soon (in the next 6-12 months)            | <b>You are currently staying competitive and that is a good sign.</b><br>But with the rapidly changing consumer behaviour, some of these systems might get obsolete in just a few months.<br>Consult with your trusted IT service provider to help you plan a road map for your business.   |
| 25+          | Upgrade Next Time<br>(check back after 12 months) | <b>Congratulations!</b><br>You are not only staying current, but also implementing industry best practices in your organisation.<br>While you may not need.   |

## DID YOU KNOW?

 IT upgrades do not have to be one big capital expenditure? You do not need to shell out \$40,000 for a single IT project all at once.

There are options to operationalize this expense and spread it out.
